<b>Re-issue of test certificates</b>	Each	\$50.00 per report
<b>Re-printing of test certificates</b>	Each	\$20.00 per report

## DISCLAIMER

Notes on Neilsen's Decorative Concrete:

- The aggregates and other raw materials used to make our decorative concrete are products by nature and therefore are subject to variation in colour, size and shape.
- Minerals in aggregate can cause staining. An approved sealer will reduce the likelihood of this condition occurring.
- Whilst every effort is made to remove contaminates from our raw materials, very small quantities of aggregate containing minerals such as oxides, impurities such as soft rock, wood and charcoal are at times found in the raw materials which are used to manufacture our decorative concrete products.
- Please refer to the Cement and Concrete Aggregates Association recommended practices for placing decorative concrete.
- Our exposed aggregate mixes are designed to be placed directly "off the chute" from concrete agitators. Please consult with us if you require to place these mixes via a concrete pump.
- Coloured Concrete must be ordered in increments of 1M3 (Whole M3's).
- We recommend an approved same day sealer be applied to coloured concrete.
- If on site water addition takes the concrete slump beyond specification colour variation and aggregate segregation may occur
- Please allow us reasonable lead time to obtain colour from our supplier.
- Delivery of concrete shall be at the kerb alignment and the company shall not in any circumstances in any dispute be liable for any indirect or consequential loss or damage of any nature whatsoever arising from entry of agitator truck and delivery to site.
